

MANCHESTER STREET CHOIRS FESTIVAL 2019
MASSED SING

WE NEED EACH OTHER NOW

And though we stumble from the edge
Our bottle gone, we drank the dregs
Our fingers still cling to the ledge
We need each other now

As borders crumble, land and sea
Bored with ideology
The skinhead and the refugee
We need each other now

*Rise up, rise up you hopeful men and women
Who might try again
And with one voice your message send: We need each other now*

We turn away and turn about
Everywhere mistrust and doubt
And one by one our lights go out
We need each other now

And while we sit upon the fence
In harmony and dissonance
The bells toll out intolerance
We need each other now

*Rise up, rise up you hopeful men and women
Who might try again
And with one voice your message send: We need each other now*

And as I watch the setting sun
I'm slow to stand and quick to run
My brother asks whose side I'm on
We need each other now

*Rise up, rise up you hopeful men and women
Who might try again
And with one voice your message send: We need each other now
We need each other now
We need each other now*
